

Sophia Lin

UX / UI Designer & Front-End Developer

sophia@webportfolio.com · +1 (604) 000-1234 · Vancouver, BC · sophialjy.github.io/sophias-portfolio-repo

PROFILE

Part-time BCIT student pursuing a career in UX/UI design, based in Vancouver. I design with intention — solving real problems through research, systems thinking, and a healthy obsession with the details. My approach is grounded: I think through edge cases before getting excited about solutions, and I'd rather find a real problem than a polished answer to the wrong question.

SKILLS

- | | |
|----------------------------------|---------------------------------------|
| ■ UX Research & User Interviews | ■ Wireframing & Prototyping |
| ■ HTML & CSS Development | ■ Information Architecture |
| ■ Presentation Design & Delivery | ■ Critical Analysis & Problem Framing |
-

EDUCATION

British Columbia Institute of Technology (BCIT)

Part-time studies — Communication & UX/UI Design · Vancouver, BC · 2024 – Present

Coursework spans UX design processes, HTML/CSS web development, presentation skills, and communication strategy. Projects include user research, wireframing, front-end development, and information architecture design.

SELECTED PROJECTS

Fabric-Composition Clothing Search Tool · UX Concept

UX Design · 2026

Identified a gap in fashion e-commerce: the inability to filter clothing by fabric composition. Conducted problem framing, competitive analysis, and early-stage wireframing for a search interface that lets users filter garments by material (e.g. 100% cotton, linen blends). Grounded in personal frustration and real user need.

Fashion Pre-Sale & New Arrival Aggregator · UX Concept

UX Design · 2026

Designed concept for a cross-platform aggregator that consolidates pre-sale and new-arrival announcements from multiple fashion brands into a single feed. Addressed cold-start and discoverability challenges through structured UX research and user flow mapping.

Portfolio Website · sophialjy.github.io/sophias-portfolio-repo

HTML / CSS Development · 2026

Designed and built a personal portfolio site from scratch using HTML and CSS. Includes project showcase, about page, and contact section. Deployed via GitHub Pages.

How to Do More Work in Less Time · BCIT COMM Final Presentation

Research & Presentation Design · 2025

Developed and delivered a research-backed presentation on productivity strategies for accomplishing more in less time. Designed speaker notes, audience interaction moments, and a rubric-aligned slide structure for a BCIT communication course final.
